

COVID-19 Return-to-Work Preparedness

COVID-19 Preparedness

Employee and Supplier Screening, Contact Tracing, Mental Health Assessments

- Save time with 48 hours deployment
- Ensure privacy with HIPAA compliant and ISO-27001 Certified Software
- Better decision making with real-time dashboards
- Maintain your branding guidelines
- Reliable 20-year battle tested software

The screenshot displays the Intelleges COVID-19 Self-Assessment questionnaire. At the top left is the Intelleges logo, and at the top right are links for 'Questionnaire (PDF)' and 'FAQ'. The main heading is '2020 GLOBAL AEROSPACE COVID-19 SELF-ASSESSMENT'. Below this, there is a paragraph explaining that the questionnaire follows CDC guidelines and uses Intelleges' clinical and data analytics capabilities. To the right, instructions state that daily symptom screening and status communication helps employers make decisions about when it is safe for employees to return to work. A progress bar is visible, and a 'SAVE FOR LATER' button is present. The main content area shows a section titled 'COVID-19 SELF-ASSESSMENT' with a sub-section '1 IMMEDIATE VIRUS RISK ASSESSMENT'. This section is divided into 'OPTIONS' and 'SELECTED' columns. The 'OPTIONS' column lists symptoms: Chills, Cough that is new or worsening, Shortness of breath, Sore throat, Difficulty swallowing, Stuffy or congested nose, Loss of taste or smell, Headache, and None. The 'SELECTED' column shows 'Fever' and 'Runny nose'.
